Overview

The Enhanced Absence Management module provides all the benefits of the Core Absence Management Module, with the additional benefits of self service, customised triggers and enhanced analytics.

Record all your absences in a single platform, with the ability to upload sickness documents and generate non-attendance graphs to track and monitor attendance and enable better decision-making.

Record Sickness, General Absence, Family Leave, Lateness, Holiday and TOIL and import absences en masse, or as they happen. Upload all absence related documents, such as Return to Work and Self Certification forms, supporting a clear audit trail and ensuring all documents are easy to find when you need them.

Gain a daily view of absences and view pre-planned absences within your calendar, to support you in managing annual leave and view individual Absence Records and heatmaps to identify trends and proactively manage emerging absence issues.

Self service allows your employees to submit their own Holiday, General Absence and TOIL ready for approval, saving valuable admin time.

Set triggers and automated alerts and build in Self Certification and Return to work forms. The module is customisable to allow for monitoring rounds, for example should a trigger point be set at 3 absences within 3 months, the system can be set to alert the Trust, when the employee hit 2 absences, allowing proactive management of potential absence concerns before they escalate.

These triggers can be adjusted on an individual basis, to allow individual situations to be managed effectively, for example if a trigger point of no further absences is given following an absence meeting.

This proactive management of absences along with numerous reports and analytics will support you being more proactive than reactive with your absences. Analytics provide a breakdown of data across both holiday and sickness absence, including a daily view of staff who are sick or absent, overall percentage attendance rate and sickness absence, absence type.

General Guidance

The data shown displays the number of absence instances, not the number of absence days.

Absences reflect the current absence period.

Search functions

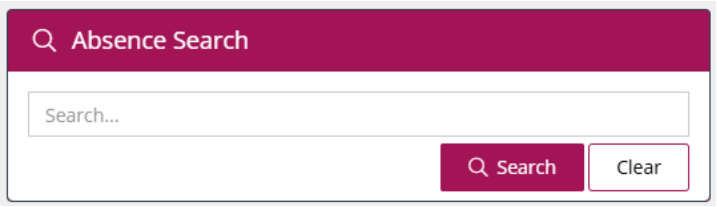
Column headings in a bold text, with a magnifying glass icon can be filtered or sorted alphabetically, chronologically, or numerically depending on the content of the column. To sort the column, click on the column heading. Click a second time to reverse the sorting.

To search in a column, click on the magnifying glass in the header of the column you want to search. From the for drop-down list, select the rule for your search then add the criteria in the field below.

Data can be exported at any time by clicking the **Export** button. Select from **Word** or **Excel**. The file will appear within your downloads.

The tabs default to **All Employees**. Click on the additional tabs to view **Employees by Department** and **Employees by Job Role**.

When viewing **Employees by Department**, you must first select the department within the **Department Filter** box on the right-hand side.



Summary

The **Summary** section of the module provides a variety of metrics, including **Employees Absent**, **Employees on Holiday**, **Attendance Rate** and **Sickness**, in addition to a number of infographics.

1. On the left-hand side of the system window, select **Absence Management**. A list of further menu options is displayed.
2. Select **Summary**. The **Absence Management** module is displayed and a variety of metrics visible.

   Absence data will default to the current absence period defined within **Settings**.

   Absence Period can be amended by entering an **Absence Period Start** and **Absence Period End**.

   Trust users can view their **Attendance Rate Compared to MAT**.

3. To view more details, click the arrow in the top right of any of these metrics to move into specific details.
4. Scroll down to view further infographics.
5. Scroll down to view **All Absences By Type**.

   Absence data will default for the current absence period defined within **Settings**.

   Absence Period can be amended by entering an **Absence Period Start** and **Absence Period End**.

Export Employee's Absence Record Data

Easily export absence data at any time to review for further analysis or attendance meetings.

1. On the left-hand side of the system window, select **Absence Management**. A list of further menu options is displayed.
2. Select **Absence Records**. The Absence Records page displays all absence records.

3. Click the eye icon to open the absence instance.
4. Scroll down to **Calendar View**.
5. Select the **List View** tab.

   To drill down into specific absence data, for example **Sickness,** click on the magnifying glass in the Absence Type header of the column, enter the absence type and click **Apply**. The table will now display only information relating to that absence type.

6. Click **Export** to export the employee's absence data.

7. Select either **Word** or **Excel** format. The file will appear within your downloads.

View Absences

Absences can be viewed within **Absence Instances** and **Absence Records**.

Absence Instances

Recent absences can be viewed within **Absence Instances**. This provides a table with all absences listed in chronological order.

The data table within **Absence Instances** displays each absence, including absence **Type**, **Reason**, **Start Date**, **End Date**, **Date Added**, current **Status**, **Department**, **Role** and **Time Lost** in days.

Click the first icon to view the employee record within the **Employees** module of the employee related to the instance, this is not their Absence Record.

Click the eye icon next to the absence to view the specific absence.

Click the third icon to view the relevant employee's full Absence Record within the **Absence Records** section of the Absence Management module. This can be useful when looking to consider patterns and trends and all absence instances relating to the employee

Click here to edit the Absence Instance.

Click the red cross icon to archive the absence. The absence will now appear within the Previous Employee Absence, along with absences relating to previous employees. Archiving the absence will remove it from all relevant metrics

Module tip!

Use the Absence Date Filter at the top of the screen to view absences within a particular time period. This is useful to view employees with high numbers of absence instances over a set period, for example the end of a specific term, or within a particular month.

This data table can be exported at any time by clicking the **Export** button. This is useful for employees who you would like to view the headline data without viewing the details of each absence.

Absence Records

Absence Records displays the total number of absence instances, broken down by employee and absence type and the **Department**, **Job Role**, current **Status** and **Attendance Rate** of each employee. This is useful in providing a birds-eye view of absences.

Click on the **Full Name** of the employee or the eye icon to view individual absence records to view **Calendar** and **List Views** and a breakdown of Absences, Holiday and TOIL, in addition to a handy heatmap.

Module tip!

Click on the title of any of the columns to sort the data by absence type. For example, double clicking on **Sickness** will show the employees with the highest sickness levels at the top of the table. This provides a useful insight into employees with high numbers of that absence type.

This data table can be exported at any time by clicking the **Export** button. This is useful for employees who you would like to view the headline data without viewing the details of each absence.

1. On the left-hand side of the system window, select **Absence Management**. A list of further menu options is displayed.
2. Select **Absence Records**. The **Absence Records** page is displayed, showing all absence records.

3. Enter the employee's name within the **Absence Search** box to search for a specific employee.
4. Click the eye icon to open an employee's absence record. The employee's absence record is displayed with key metrics.

Weekday Absence Heatmap

The heatmap provides a useful insight into patterns of absences.

Weekday Absence Heatmap:

5 or more absence instances on a particular day will highlight the day in amber.

10 or more absence instances on a particular day will highlight the day in red.

Should a member of staff have 5 or more absence instances on a Friday, the **F** will be highlighted in amber. Should the pattern continue to 10 or more instances, the **F** will change to red.

Calendar View

The **Calendar View** provides a calendar displaying all holiday, general absence and sickness.

Click on **Month/Week/Day** to change the view.

Use the arrows at the top left of the calendar to view the previous month/day.

List View

The **List View** provides a list of all holiday, general absence and sickness.

Click the pencil icon within any of the rows to view and edit any of the information.

Audit Log

The **Audit Log** tab will display all changes made to the record, including absences created, restored and archived, uploaded documents, a date stamp and who the activity was completed by.

Edit/Update Absence

Absences can be updated, for example with a **Last Day of Absence** once the employee has returned to work. All amendments to absences will be displayed within the **Audit Trail**.

Delete/ Archive an absence

1. On the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Click **Absence Instances**. The **Absence Instances** page is displayed showing all absence instances.
3. In the **Absence Search** box, type the name of the employee
4. Filter the columns with the **magnifying glass** to find the Absence you need.
5. In the far-right hand column, click on the red cross to **Archive Absence**
6. Scroll down and click on the **View Archived Absences** button 

7. Filter the columns with the **magnifying glass** to find the Absence you need.
8. In the far-right hand column, click on the red cross to **Delete Absence**
9. A pop up will appear asking you to confirm if you want to permanently delete the absence. Click on the **Delete** button to do so or click on the **Cancel** button.

Edit/update an absence within Absence Records

There are two methods for amending a sickness absence. Absences can be amended via Absence Records, which is useful when you wish to amend an absence related to a specific employee. Alternatively absences can be amended via Absence Instances, this is useful when you wish to view and update recent absence end dates.

1. On the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Click **Absence Record**. The **Absence Record** page is displayed showing all absence records.
3. Click the eye icon to open the absence instance.
4. Scroll down to **Calendar View**.
5. Select the **List View** tab.
6. Click the pencil icon within any of the rows to view and edit or add information. A new window is displayed.
7. Amend or add information and click **Save** to finish.

Edit/Update an absence via Absence Instances

1. On the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Click **Absence** Instances. The **Absence Instances** displays all absence instances.
3. Click on the **End Date** title. This will show all absences without an end date and therefore absence instances that need to be updated with an end date.
4. Click the pencil icon next to the absence you wish to amend. The absence instance is displayed.
5. In the **Last Day of Absence** field, select the date and time you wish to amend.

   If the time is left empty, the system will assume that the employee has been absent for the full day.
6. Add/amend any further details within the record.
7. Scroll down to the bottom of the page.
8. Click **Save** to finish.

Add Self Certification

Self Certification can be completed at any time after the absence has been added. Within the Core Absence Module, Self Certification should be added by the school/trust on behalf of the employee. It can be added immediately or can be added at any time after the absence has been added by selecting the relevant absence within the absence record and clicking the pencil icon.

Self Certification can only be added if **Last Day of Absence** is populated.

If the **Self Certification** form is not relevant, tick the **Disable Self Certification** box. The **Return to Work** button will still appear within the absence but a task will not be sent to complete it.

You can choose to complete the system Self Certification form or upload an alternative form.

1. Click the **+ Add Self Certification** button.

2. In the **Brief Description of Illness** field, enter a brief description.
3. Tick the **Was your sickness due to a workplace injury or incident?** box if relevant.
4. Tick the **Did you visit a doctor?** box if relevant.
5. Click **Save** to finish.

Upload an alternative form

An alternative Self Certification form can be added instead of completing the fields displayed.

1. Click the **Choose File** button in the bottom left-hand corner of the pop-up window.

   
2. Select the relevant form from your files.
3. Click **Save** to finish.

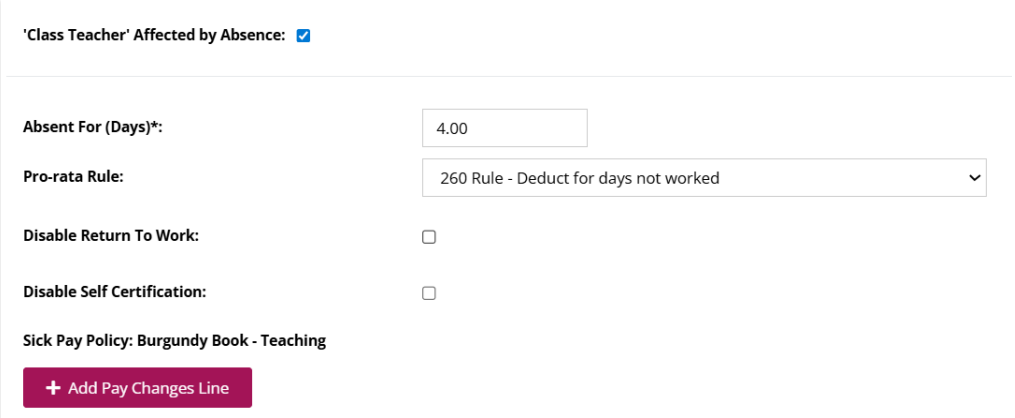
   

Add Return to Work

Return to Work can be completed at any time after the absence has been saved. It can be added immediately or added by selecting the relevant absence within the absence record and clicking the pencil icon.

Return To Work forms can only be added if **Last Day of Absence** is populated.

If the **Return to Work** form is not relevant, tick the **Disable Return To Work** box. The Return to Work button will still be available to complete but a task will not be sent to complete it.



Either complete the form or click the **Upload Alternative Return to Work Interview** button to add an alternative form.

1. Click on the **Edit Details** button.

2. Click the + **Add Return to Work Form** button.

3. In the **Return to Work Interview Date** field, enter the date of the Return To Work meeting.
4. In the **Meeting Notes** field, enter any relevant notes from the meeting.
5. Tick the **Was the employee's absence work-related?** box if relevant.
6. Tick the **Does the employee require support to prevent further absences?** box if relevant.
7. Tick the **Does this Employee require a Phased Return?** box if relevant.
8. Tick the **Was the school's sickness reporting procedure followed?** box if relevant.

9. Tick the **Was the absence a result of an accident at work?** box if relevant.

   Ticking the box will display a **Did you report the accident?** box is displayed. Tick if relevant.

10. In the **Are you taking any medication that work needs to be aware of?** field enter any relevant medications if applicable.
11. In the **Support Offered** field, enter any support offered.
12. In the **Further Action Taken** field, enter any relevant further action taken.
13. Click **Save** to finish.

Upload an alternative form

An alternative **Return to Work** form can be added instead of completing the fields displayed.

1. Click **Choose File** button in the bottom left-hand corner of the pop-up window.

2. Select the relevant form from your files
3. Click **Open**.
4. Click **Save** to finish.

Add Phased Returns

Important

Please note that the Phased Return Functionality is for information purposes only and the changes made to the working pattern will **NOT** affect the employee's salary or any other payments. Please raise a ticket on our client communication channel with your payroll team to inform them of this change.

Scroll down to the bottom of the page. The **Phased Returns** tab is displayed.

1. Click the **+ Add Phased Return** button. A new window is displayed.

2. Enter a **Start Date** and **End Date** for the phased return
3. Select the relevant **Job Role**
4. Click in the **Details** box and include any significant details
5. Click on the **Update Schedules** button. This will then calculate the **Number of Weeks** the phased return will run for.
6. Click on the **Save** button

Add Notes

Once an absence has been created, **Notes** can be added to the absence (this applies to all absence types).

1. Select the **Notes** tab at the bottom of the screen. The **Notes** tab is displayed.
2. Click **+ Add Note**. A new window is displayed.

3. In the field, enter any relevant notes.
4. Click **Save** to finish.

5. Click **Back** at the top of the page. The absence record is displayed.

Audit Trail

The **Audit Trail** provides a detailed record of all changes made to this absence.

Add Documents

Once an absence has been created, **Documents** can be added to the absence (this applies to all absence types).

Important

Letters related to the absence should not be added as documents but instead created following the process outlined within the **Absence Letters and Documents Guide**.

1. Scroll down to the bottom of the page. The **Documents** tab is displayed.
2. Click the **+ Add Document** button. A new window is displayed.

3. Click **Upload File** and select the document you wish to upload from your files.
4. In the **Title** field, provide a title for the document.
5. Click **Save**.

Add an absence

Please note that schools and Trusts with Core Absence Management do not have access to employee self-service. All absences must be entered by the school or Trust.

Add a sickness absence

1. From the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Select **Absence Records**. The Absence Management module is displayed, showing all absence records.
3. Find the employee record you wish to view.
4. Click the eye icon next to the employee you wish to view. The employee's **Absence Record** is displayed.
5. Click the **+ Add Sickness** button at the top of the screen. A new page is displayed.

6. From the **Reason for Absence** drop-down menu, select the option you require.

   You must ensure you choose the correct absence type ie Sickness or General Absence, as this cannot be edited once the absence is saved.

   Reason for Absence will display the options you selected within **Absence Settings**.

7. In the **First Day of Absence** field, select a date from the calendar, followed by a time.
8. In the **Last Day of Absence** field, select a date from the calendar, followed by a time.

   The **Last Day of Absence** can be left empty and amended at a later date should the absence be extended.

   If **Time** is left empty, the system will assume the employee has been absent for the full day.

9. Tick the **Pregnancy Related Absence** box if the absence relates to a pregnancy.
10. Tick the **Disability Related Absence** box if the absence relates to a disability.
11. Tick the **Accident At Work** box if the absence relates to an accident at work.
12. In the **Details** field, add any relevant details. This field should not be left empty.

    We recommend including detailed notes within this field to support any future attendance issues.

13. In the **Roles** field, select all the roles that the absence relates to.

    The system will calculate the workings days lost for **Absent For (Days)** using the information in the system. This is shown in the **Use Suggested** box. Click the box to confirm the suggested working time lost.

14. In the **Absent for (Days)** field either click the **Use Suggested** button to populate the field or override manually by entering a number into the field.

15. Leave the **Pro Rata Rule** field unchanged.

    Changing this will affect calculations and therefore impact payroll.

16. Tick the **Disable Return To Work** box if you wish to disable the requirement to complete a Return To Work form.

    The **Return to Work** button will still be visible but a task will not be sent to complete it.

17. Tick the **Disable Self Certification** box if you wish to disable the requirement to complete a Self Certification form.

    The **Self Certification** button will still be visible but a task will not be sent to complete it.

18. Click **Save**. A number of additional options will appear at the bottom of the page.

    Any errors or incomplete information will be displayed within an error message.

Pay Changes

Once saved, the system with automatically calculate any pay changes. The following message will appear:

Should the absence hit nil or half pay this will be displayed within a table below the absence. If no table is displayed the absence has not hit nil or half pay.

Date of Pay Change	Pay Percentage	Statutory Sick Pay	Policy Name	
17 Feb 2025	0.00 %	No	Green Book - Support	

Add a manual pay change

If an agreement outside the nil or half pay point described within your policy has been made, the system calculation can be overridden via the **Add Pay Changes Line** button. For example, if the school has agreed to pay the employee an additional week at their full time rate.

1. Click the **Add Pay Changes Line** button.

   
2. In the **Percentage** field, enter a percentage

   This is the percentage of pay the employee will receive from the **Active From** date.

3. In the **Active From** field, select the date in which this percentage should apply.
4. Move the **Statutory Sick Pay** toggle to **YES** or **NO**.
5. Click **Save**.

   Once an absence has been created, add the relevant **Return To Work**, **Self Certification**, **Phased Returns**, **Notes** and **Documents** click the links to view these guides.

6. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

Add General Absence

1. Select **Absence Records.** The **Absence Management** module is displayed showing all absence records.
2. Find the employee record you wish to view.
3. Click the eye icon next to the employee you wish to view. The employee's absence record is displayed.
4. Click the **+ Add General Absence** button at the top of the screen. A new page is displayed.

   
5. From the **Reason for Absence** drop-down menu, select the option you require.

   These are set up by EPM. If the absence reason you require is not included, please speak to your EPM Team.

6. In the **First Day of Absence** field, select a date from the calendar, followed by a time.
7. In the **Last Day of Absence** field, select a date from the calendar if known, followed by a time.

   If the time is left empty, the system assumes the employee has been absent for the full day.

   The **Last Day of Absence** can be added/amended at a later date.

8. In the **Details** field, add any relevant details.

   We recommend including detailed notes within this field to support any future attendance issues.

9. In the **Roles** field, select all the roles that the absence relates to.

   The system will calculate the workings days lost for **Absent For (Days)** using the information in the system. This is shown in the **Use Suggested** box.

10. In the **Absent for (Days)** field either click the **Use Suggested** button to populate the field or override manually by entering a number into the field.
11. Click **Save**. A number of additional options will appear at the bottom of the page

    Any errors or incomplete information will be displayed within an error message.

    Once an absence has been created, **Notes** and **Documents** can be added to the absence (this applies to all absence types). Please see **Edit Absences within Absence Records** section of this guide for more information. Any changes made to the absence will appear within the **Audit Trail** tab.

    Once an absence has been created, add the relevant **Return To Work**, **Self Certification**, **Phased Returns**, **Notes** and **Documents** click the links to view these guides.

Add Holiday

1. On the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Click **Absence Records**. The **Absence Management** module is displayed showing all absence records.
3. Find the employee record you wish to view.
4. Click the eye icon next to the employee you wish to view. The employee's absence record is displayed.
5. Click the **+ Add Holiday** button at the top of the screen. A new page is displayed.

   
6. In the **First Day of Absence** field, select a date from the calendar, followed by a **Time**.
7. In the **Last Day of Absence** field, select a date from the calendar, followed by a **Time**.

   The **Last Day of Absence** can be amended at a later date should the absence be extended. This can be left empty and added at a later date.

   If **Time** is left blank, the system will assume the employee has been absent for the full day.
8. In the **Details** field, add any relevant details.

   We recommend including detailed notes within this field to support any future attendance issues.

   The system will display the **Allowance Period** under **Details** and the **Annual Leave Allowance, Taken, Awaiting Approval** and **Remaining** under each role listed under **Roles**.
9. In the **Roles** field, select all the roles that the absence relates to.
10. In the **Absent for (Days)** field either click the **Use Suggested** button to populate the field or override manually by entering a number into the field.

    The system will calculate the workings days lost for **Absent For (Days)** using the information in the system. This is shown in the **Use Suggested** box.

11. Click **Save**. A number of additional options will appear at the bottom of the page

    Any errors or incomplete information will be displayed within an error message.

    Once an absence has been created, **Notes** and **Documents** can be added to the absence (this applies to all absence types). Please see **Edit Absences within Absence Records** section of this guide for more information. Any changes made to the absence will appear within the **Audit Trail** tab.
12. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

    Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.

Add Family Leave (Maternity, Paternity, Shared Parental, Bereavement, Neonatal Care and Adoption Leave)

1. On the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Click **Absence Records**. The **Absence Management** module is displayed.
3. Find the employee record you wish to view.
4. Click the eye icon next to the employee you wish to view. The employee's absence record is displayed.
5. Click the **+ Add Family Leave** button at the top of the screen. Three options are displayed.

6. Select **Paternity**, **Maternity**, **Shared Parental Leave**, **Bereavement, Neonatal Care** or **Adoption Leave**.

Add Maternity Leave

All education staff and teachers in the UK are entitled to take up to 52 weeks of maternity leave, regardless of how long they have worked at the school or institution.

The 52-week entitlement is split into two parts:

- **Ordinary Maternity Leave (OML):** The first 26 weeks.
- **Additional Maternity Leave (AML):** The remaining 26 weeks, which immediately follow OML.

Important

Before entering maternity leave ensure you have a saved copy of both the MATB1 and Maternity Application forms, ready to upload.

1. In the **Due Date** field, select a due date.

   The **Earliest Leave Start Date** will be calculated automatically.

2. In the **MATB1 Seen** field, select a date.

   This is the date the MATB1 form was seen.

3. Click **Upload File** to add upload a copy of the MATB1 and Maternity Application forms.

4. Select the document from your files.
5. In the **Requested Start Date** field, select a date.

   This is the date the employee has requested to start Maternity Leave.

6. In the **Actual Start Date** field, select a date.

   The **Actual Start Date** can be amended at a later date.

The **Earliest Leave Start Date** will be calculated automatically. This is the earliest date the employee can take maternity leave and is based on the **Due Date**.

The **End of Ordinary Leave** date will be calculated automatically. This marks the completion of the first 26 weeks of the total 52-week Statutory Maternity Leave period

The **Additional Leave End Date** will be calculated automatically. This is the final calendar day of the employee's 52-week total Statutory Maternity Leave, which marks the exact conclusion of the 26-week Additional Maternity Leave period.

7. In the **Requested End Date** field, select an end date.

   This is the date the employee has requested to end their maternity leave.

> **Important**
>
> Absence Duration must be in full weeks from the **Requested Start Date**. For example, a full years Maternity Leave starting on 07/10/24 should end exactly 52 weeks later.

8. Tick the **Replaced by Shared Parental Leave** field if this applies.

   If this box is ticked, a new Absence Request for Shared Parental Leave should be completed. View the Add Shared Parental Leave Guide below for more Information

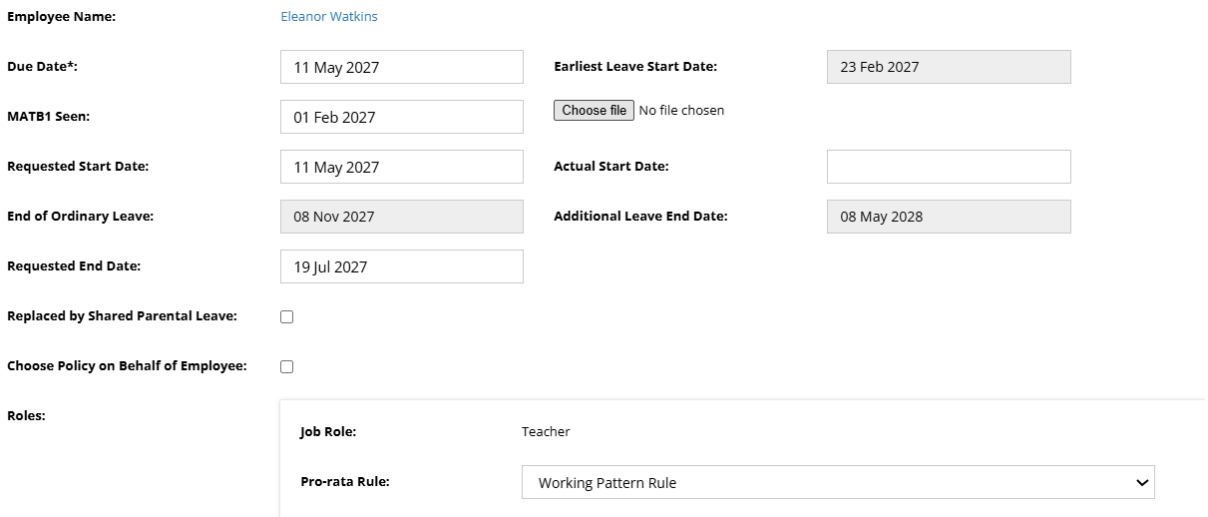
9. Tick the box next to the role(s) relevant to the maternity leave to confirm they meet the average weekly earnings requirement.
10. For each **Job Role**, the relevant **Pro-rata Rule** is displayed. This should not be changed.

    This is set up when the relevant employee's job role is added and ensures the days are deducted in line with the correct calculations.

    For Teachers - select **365 Rule – Pay** for days worked

    For Support Staff - select **Calendar Days in Period**.

11. The **Select Pay Policy** field should not be changed.



12. Click **Save**. A number of additional options will appear at the bottom of the page

    Any errors or incomplete information will be displayed within an error message.

    Once an absence has been created, **Notes** and **Documents** can be added to the absence (this applies to all absence types). Please see **Edit Absences within Absence Records** section of this guide for more information. Any changes made to the absence will appear within the **Audit Trail** tab.

13. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

    Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.

Add Paternity Leave

Eligible employees can take 1 or 2 weeks of statutory paternity leave. Paternity leave must be taken at any point during the first year after the birth or adoption of the child. Paternity leave must be taken in whole weeks (you cannot split it into individual odd days).

Employee have the option to take paternity leave as a block or as two separate periods (split) of one week each.

1. In the **Due Date** field, select a due date.
2. In the **Actual Birth Date** field, select a date.

   This can be added at a later date.

3. From the **Block or Split Leave** drop-down menu, select **Block** or **Split**.

   Employee have the option to take paternity leave as a block (**Block**) or as two separate periods (**Split**) of one week each.

4. In the **Start Date** field select the start date or if **Split Leave**, enter the **Week 1 Start Date**.
5. In the **End Date** field select the end date or if **Split Leave**, enter the **Week 1 End Date**.

   This should be exactly 7 days after the start date.

6. If **Split Leave**, select the **Week 2 Start Date**.
7. If **Split Leave**, select the **Week 2 End Date**.

   This should be exactly 7 days after the start date.

8. Tick the box next to the role(s) relevant to the Paternity Leave to confirm they meet the average weekly earnings requirement.
9. For each **Job Role**, the relevant **Pro-rata Rule** is displayed. This should not be changed.

   This is set up when the relevant employee's job role is added and ensures the days are deducted in line with the correct calculations.

10. Click **Save**. A number of additional options will appear at the bottom of the page

Any errors or incomplete information will be displayed within an error message.

Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.

11. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

Add Shared Parental Leave

Shared Parental Leave (SPL) allows eligible parents to share up to 50 weeks of leave and 37 weeks of pay during their child's first year. In the education sector, it offers unique scheduling flexibility because it can be taken in discontinuous blocks separated by returns to work

The birth mother or primary adopter must cut short (curtail) their standard maternity or adoption leave and pay to create the pool of shared leave.

The birth mother must take a mandatory 2 weeks of leave (Compulsory Leave) following the birth (4 weeks for factory workers) before any leave can be shared.

Parents can take leave at the same time, take turns, or return to work in between blocks of leave.

Employees on SPL can work up to 20 Shared Parental Leave in Touch (SPLIT) days without ending their leave, separate from standard Keeping in Touch (KIT) days

Shared Parental Leave can be taken in a maximum of three blocks or as a single block. Therefore, only complete the blocks you require.

1. In the **Binding Notice Given to end Maternity Leave/Adoption Leave on*** field, select a date.

   A Binding Notice is a formal, written decision by a mother or adopter to end their maternity leave or Statutory Maternity Pay (SMP) early.

2. In the **Binding Notice Given to end Maternity Leave/Adoption Pay on*** field, select a date.

   Maternity Pay/Adoption Pay needs to be curtailed before requesting Shared Parental Leave. Enter the date requested to curtail Maternity Pay/Adoption Leave.

3. In the **Date Maternity Leave/Adoption Leave Ends*** select a date.

   This is the last date of Maternity/Adoption Leave. This should be in full weeks. For example, if the Maternity Leave began on a Wednesday, the leave should end on a Tuesday.

4. In the **Date Pay Ends*** select a date.

   This is the last date the employee will be paid Maternity Leave/Adoption Leave.

   This should be in full weeks. For example, if the Maternity Leave began on a Wednesday, the leave should end on a Tuesday.

5. In the **Child's Date of Birth Or Date of Placement*** field, select a date.

   This is the date given on the MATB1 or the Date of Placement certificate

6. In the **Number of Weeks Leave taken by Leave End Date*** field, enter a number.

This is the number of weeks Maternity /Adoption Leave taken prior to curtailment.

7. In the **Number of Weeks Adoption/Maternity Pay taken by Pay End Date*** field, enter a number.

   This is the number of weeks Adoption/Maternity Pay already taken before curtailment.

8. Tick the **Choose Policy on Behalf of Employee** box if relevant.

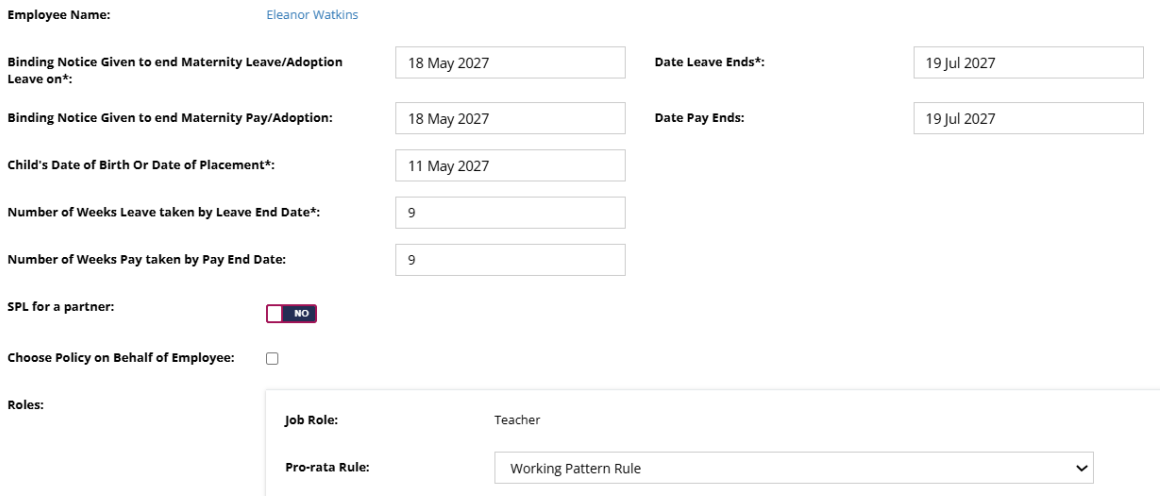
   An additional **Select Pay Policy** field will be displayed within the **Roles** section of the screen. Select the relevant policy.

   Leaving the box unticked will raise a task for the employee to select the policy.

   Ticking the box will display an additional **Select Pay Policy** field under **Roles**.

9. For each **Job Role**, the relevant **Pro-rata Rule** is displayed. This should not be changed.

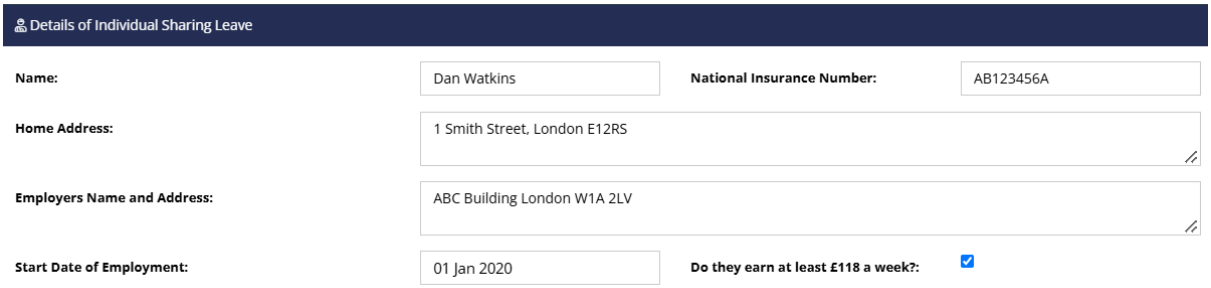
   This is set up when the relevant employee's job role is added and ensures the days are deducted in line with the correct calculations.



10. Within the **Details of Individual Sharing Leave** section at the bottom of the screen, enter the **Name** of the partner sharing the leave.
11. In the **National Insurance Number** field, add the partner's National Insurance Number.
12. In the **Home Address** field, add the partner's home address.
13. In the **Employers Name and Address** field, add the partner's employer's names and address.
14. In the **Start of Employment** field, select a date.

    This is the date the partner started their employment.

15. Tick the **Do they earn at least £118 a week?** box to confirm that they earn £118 per week.



16. Click **Save**. Additional fields will appear further down the screen.

e Shared Parental Leave can be taken in a maximum of three blocks or as a single block. Therefore, only complete the blocks you require.

17. In the **Notifications** tab, within **Notice One Given** field, enter the date that the notice was given.

    Notice One Given refers to the date that the first period of leave notice was submitted by the employee.

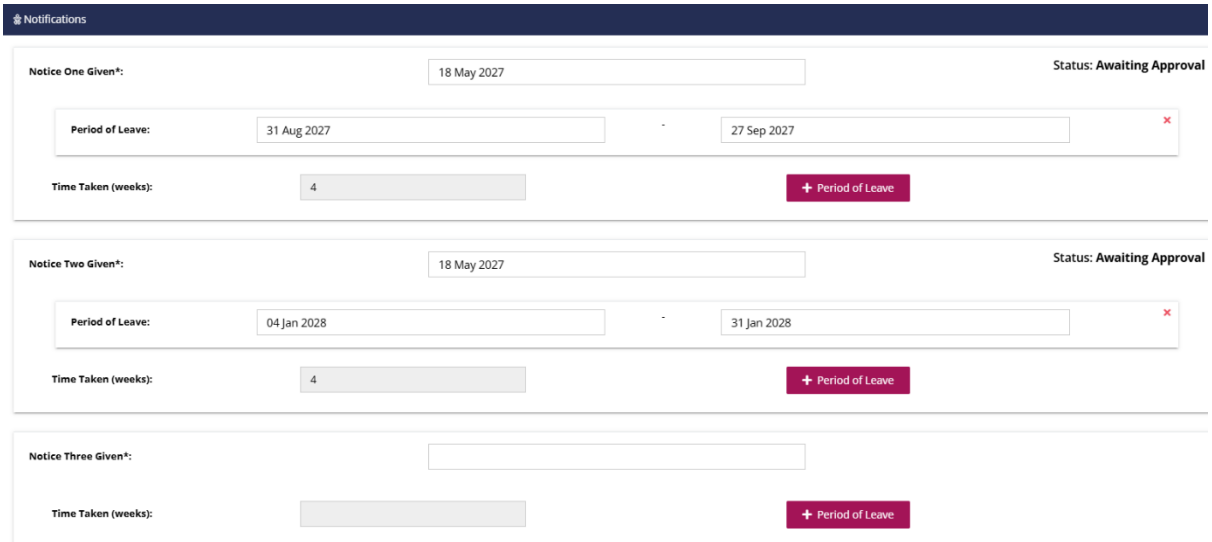
    The **Time Taken (weeks)** field will auto populate based on the date you have entered.

18. Click the **+ Period of Leave** button.

19. In the **Start Date** field, enter the date the leave starts for this period.
20. In the **End Date** field, enter the date the leave ends for this period.
21. Click the **+ Add Period** button to confirm.

22. Complete the relevant field for any additional blocks of leave required.

    Shared Parental Leave can be taken in a maximum of three blocks of leave.



23. Click **Save**. A number of additional options will appear at the bottom of the page

Any errors or incomplete information will be displayed within an error message.

Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.

24. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

Add Adoption Leave

Education employees in the UK are entitled to up to 52 weeks of Statutory Adoption Leave, alongside protected employment rights and specialised time off for appointments.

1. Enter the date the **Adoption Document** (was) **Seen**.
2. Click the **Upload File** button and upload the **Adoption Document Seen**document.

3. In the **Notice Given Field** select the date notice was given.
4. In the **Requested Start Date** field, select the requested start date.
5. In the **Actual Start Date** field, select the actual start date.
6. In the **End Date** field, select the end date.

   Absence duration must be in full weeks from Start Date.

7. In the **Matching Date** field, select the matching date.

   The **Matching Date** (or matching week) is the exact date or week when the adoption agency formally notified the employee that they had been matched with a child to be placed in their care.

8. In the **Expected Placement Date** field, select the expected placement date.

   This is the date provided by the adoption agency regarding when the child is forecasted to move into the employee's home

9. In the **Placement Date** field, select the placement date.

   This is the exact day the child physically starts living with the employee permanently ahead of a formal legal adoption.

   Only one of the **Expected Placement Date** or **Placement Date** must be completed.

25. Tick the **Choose Policy on Behalf of Employee** box if relevant.

   An additional **Select Pay Policy** field will be displayed within the **Roles** section of the screen. Select the relevant policy.

   Leaving the box unticked will raise a task for the employee to select the policy.

   Ticking the box will display an additional **Select Pay Policy** field under **Roles**.

10. Tick the box next to the role(s) relevant to the Adoption Leave to confirm they meet the average weekly earnings requirement.
11. For each **Job Role**, the relevant **Pro-rata Rule** is displayed. This should not be changed.

    This is set up when the relevant employee's job role is added and ensures the days are deducted in line with the correct calculations.
12. Click **Save**. A number of additional options will appear at the bottom of the page

    ; or incomplete information will be displayed within an error message.

    Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.
13. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

Add Bereavement Leave

Bereavement Leave should only be used in the event of the death of a child. For attending a funeral, please select **General Absence.**

1. Click the **Upload File** button and upload the **Declaration**.

2. In the **Notice Given On** field, select the date notice was given.
3. From the **Block or Split Leave** drop-down menu, select **Block** or **Split**.
4. In the **Start Date** field select the start date or if **Split Leave**, enter the **Week 1 Start Date**.
5. In the **End Date** field select the end date or if **Split Leave**, enter the **Week 1 End Date**.

   This should be exactly 7 days after the start date.
6. If **Split Leave**, select the **Week 2 Start Date**.
7. If **Split Leave**, select the **Week 2 End Date**.

   This should be exactly 7 days after the start date.
8. In the **Date Of Passing** field, select the date the person passed.
9. Tick the box next to the role(s) relevant to the **Bereavement Leave** to confirm they meet the average weekly earnings requirement.
10. For each **Job Role**, the relevant **Pro-rata Rule** is displayed. This should not be changed.

    This is set up when the relevant employee's job role is added and ensures the days are deducted in line with the correct calculations.
11. Click **Save**. A number of additional options will appear at the bottom of the page

    Any errors or incomplete information will be displayed within an error message.

    Once an absence has been created, **Notes** and **Documents** can be added to the absence (this applies to all absence types). Please see **Edit Absences within Absence Records**

section of this guide for more information. Any changes made to the absence will appear within the **Audit Trail** tab.

12. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**

    Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.

Add Lateness

1. On the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Click **Absence Records**. The **Absence Management** module is displayed showing all absence records.
3. Find the employee record you wish to view.
4. Click the eye icon next to the employee you wish to view. The employee's absence record is displayed.
5. Click the **Add Lateness** button at the top of the screen.

   
6. In the **Employee Name** field, enter the employee's name.
7. In the **Reason for Absence** field, select a reason. The reasons displayed are determined within **Settings**.

   Speak to your EPM team if the reason you require is not available.

8. In the **Date**, field select a date.
9. In the **Time of Arrival**, field select a time.
10. In the **Time Expected**, field select a time.
11. In the **Notes** field, enter any relevant notes.
12. In the **Roles** field, select all the roles that the lateness relates to.
13. In the **Absent For (Hours)*** field either click the **Use Suggested** button or enter the number of hours absent.

14. Click **Save**. A number of additional options will appear at the bottom of the page

    Any errors or incomplete information will be displayed within an error message.

    Once an absence has been created, **Notes** and **Documents** can be added to the absence (this applies to all absence types). Please see **Edit Absences within Absence Records** section of this guide for more information. Any changes made to the absence will appear within the **Audit Trail** tab.

15. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

    Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.

Add TOIL

Both earnt and spent TOIL (Time Off In Lieu) can be added to the system within **Absence Management**.

If TOIL is not shown as an option within the Absence Record, this may be due to the setting being switched off within **Main Settings** within **Absence Management Settings**. Please speak to your school HR/Central Team before adjusting these settings.

Earn TOIL

1. On the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Click **Absence Records**. The **Absence Management** module is displayed showing all absence records.
3. Find the employee record you wish to view.
4. Click the eye icon next to the employee you wish to view. The employee's absence record is displayed.
5. Click the **Add TOIL** button at the top of the screen. Further options are displayed.

6. Select **Earn TOIL**. A new **Add Time Off in Lieu Earned** window is displayed.
7. In the **Start of TOIL** field, select the first date of the period the Time Off In Lieu was earned.
8. In the **End of TOIL** field, select the last date of the period the Time Off In Lieu was earned.

    This may be the same date as the date entered within **Start of TOIL**

9. From the **TOIL** Reason drop-down menu, select a reason.
10. In the **Notes** field, enter any relevant notes.
11. Select all **Roles** that apply.
12. In the **TOIL Hours Earned** field, enter the total number of hours earned.
13. Click **Save**. A number of additional options will appear at the bottom of the page

    Any errors or incomplete information will be displayed within an error message.

    Once an absence has been created, **Notes** and **Documents** can be added to the absence (this applies to all absence types). Please see **Edit Absences within Absence Records** section of this guide for more information. Any changes made to the absence will appear within the **Audit Trail** tab.

14. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

    Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.

Spend TOIL

1. On the left-hand side of the system window, click **Absence Management**. A list of further menu options is displayed.
2. Click **Absence Records**. The **Absence Management** module is displayed showing all absence records.
3. Find the employee record you wish to view.
4. Click the eye icon next to the employee you wish to view. The employee's absence record is displayed.
5. Click the **Add TOIL** button at the top of the screen. Further options are displayed.

   
6. Select **Spend TOIL**. A new **Spend Time Off in Lieu Earned** window is displayed.
7. In the **Start of TOIL** field, select the first date of the period the Time Off In Lieu was spent
8. In the **End of TOIL** field, select the first date of the period the Time Off In Lieu was spent.
9. From the **TOIL Reason** drop-down menu, select a reason.
10. In the **Notes** field, enter any relevant notes.
11. Select all **Roles** that apply.
12. In the **Absence for (Hours)** field, enter the total number of hours.
13. Click **Save**. A number of additional options will appear at the bottom of the page

    Any errors or incomplete information will be displayed within an error message.

    Once an absence has been created, **Notes** and **Documents** can be added to the absence (this applies to all absence types). Please see **Edit Absences within Absence Records** section of this guide for more information. Any changes made to the absence will appear within the **Audit Trail** tab.

14. Click **Back** at the top of the page. The absence you have added will be displayed within the **Calendar View**.

    Once an absence has been created, add the relevant **Notes** and **Documents** click the links to view these guides.

View and Approve Absence Requests

This page shows all absence requests that you can approve. The absences you can approve are managed via **Approval Tags** within **Absence Settings** and the **Job Information** page of the **Employee Record**. The enhanced **Absence Management Module** allows absences to be entered either by HR and Admin staff within **Absence Records**, or by the employee themselves, via the self-service function within **My Portal**.

To manage **Absence Approvers**, see our **Absence Management Settings** Guide.

Open Absence Requests are requests that are yet to be approved or denied, while **Closed Absence Requests** have already been approved.

1. On the left-hand side of the system window, select Absence Management. A list of further menu options is displayed.
2. Select **Approve** . The **Approve Absence Requests** page is displayed. This will show all open and closed absences.

Approve Absence Requests

This section displays all open absence requests. Each request will display the **Employee Name**, **Reason**, **Start Date**, **End Date**, **Details** and **Roles**, in addition to the total days requested. From here the approver can approve, reject or request changes.

1. Find the employee absence you wish to view.
2. Click on the **Name** of the requester or the icon in the **Actions** column. The absence request is displayed within a new window.
3. Scroll down to the **Approve As** section.

   The **Approve As**: section will be displayed with a suffix describing the **Approver Tag** the Approver holds – for example *Approve as Line Manager*, *Approve as HR* etc.

4. In the **Status** field, select a status.

   The **Request Changes** status allows the user to ask the person who has entered the absence to make changes and resubmit the absence, for example reducing the number of days requested, without the need to re-create the entire absence request.

5. In the **Message** field, add a message.
6. Click **Save** to finish.

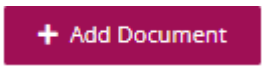
   

7. Scroll down to the bottom of the page to the **Documents**, **Notes** and **Audit Trail** tabs.

Documents

Here you can view and add documents to the absence.

1. Click the **+ Add Document** button to add a document.

2. Click the **Upload File** button.

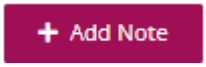
   

3. In the **Title (Optional)** field, add a title.
4. Click **Save** to finish.

Notes

Here you can view and notes to the absence.

1. Click the **+ Add Note** button to add a note.



2. In the **Note** field, add a note.
3. Click **Save** to finish.

Audit Trail

Each absence request has a full audit trail, with the ability to view all changes made.

Import Absences

Absence data can be uploaded en-masse within the **Import Absences** area of the module.

Unlike the Import Employees spreadsheet information can only be added, not edited via the Import Spreadsheet.

Please speak to the Connect Team before importing absences and ensure:

1. Only that paid absences are imported. Importing Unpaid absences will result in a deduction from the employee's pay, even if the absence is historical.
2. Ensure no duplicate absences are imported.

When adding absences within the **Download Import Spreadsheet**, absences should be recorded consistently as either **Hours** or **Days**. If you decide to use days, absences which are less than a day, can be recorded as a decimal, for example 0.17 days. We therefore recommend that absences are recorded in days, rather than hours. This can be amended within **Settings**.

1. On the left-hand side of the system window, select Absence Management. A list of further menu options is displayed.
2. Select **Import Absences**. The **Import Absences** page is displayed. This will show all absence records.

   As **the Import Absence** function is designed to import not edit absences, we recommend leaving **the Include Previous Roles** and **Include Previous Employees** boxes unticked.

3. Click the **Download Import Spreadsheet** button.

4. A **Downloading - please wait** message will appear.

5. Once downloaded, an Excel spreadsheet will open. Click the **Enable Editing** button in the top yellow bar of the document. This will open an instructions page. Read this carefully.

   The columns within the spreadsheet match the details within the **Absence Management** module and the same mandatory fields apply.

   Re-look at the **Instructions** tab to check the formatting information that applies to each coloured cell.

   The tabs along the bottom of the spreadsheet include all types of absences included within Absence Records.

6. Click on the relevant tab at the bottom of the spreadsheet for example the **General Absence** tab.

7. Add a **User ID**. This is the email address of the employee and must match the email address stored against the employee within the system.

8. Add the information within each column.
9. Move through the additional tabs and add any other information.

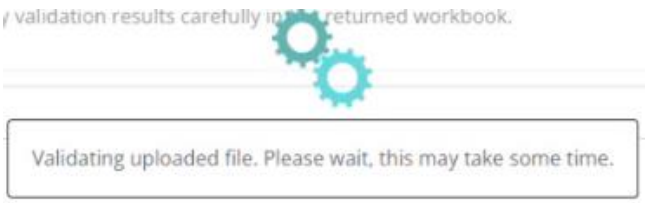
Import the spreadsheet and check for errors

1. Save the document by clicking **File > Save** and return to the system screen.
2. Scroll down to the **To Import Your Data** section and click the **Choose File** button. This will open up a new **Open** window.

3. Go to **Downloads** and open up the last file you downloaded and click **Open** at the bottom of the window. You will return to the main screen.

4. Click the **Validate** button and the system will check the document through for any warnings or errors within the document.

5. A message will appear to show the document is being checked.



6. If the file passes validation you will see the following message within the screen.

7. If this message appears click the **Import** button. If a message appears displaying any errors and warnings, see **Errors and Warnings** below.

8. A **Confirm Import** window will appear. Please be aware that any information you have changed within the spreadsheet will overwrite any information in the system, if you do not wish to over-ride these changes click **Cancel** or to override these, click **Import**.

9. A message will appear whilst the system imports the information and the data within the spreadsheet will be imported into the module.

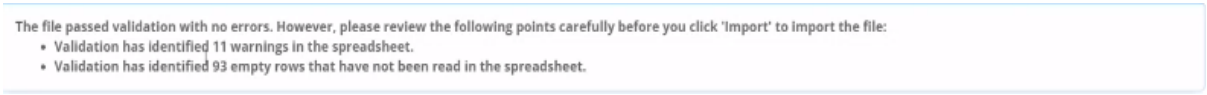
10. Once the information is imported you will see the following message within the screen:

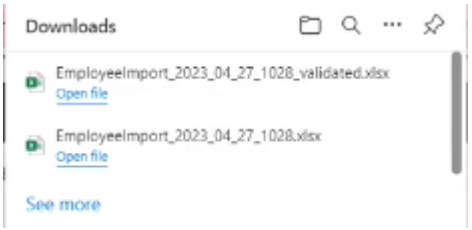
11. To view the details you have added, go to the left-hand side of the system and click **Absences**. A list of further menu options will appear.
12. Click **Import Absences**. The **Absences** page is displayed. This will show all absence records.

    Once imported the spreadsheet you have used before cannot be used again. Therefore, should you need to repeat the process you will need to repeat the process again, downloading the spreadsheet again.

Errors and Warnings

If a message appears displaying any errors and warnings, follow the instructions below.





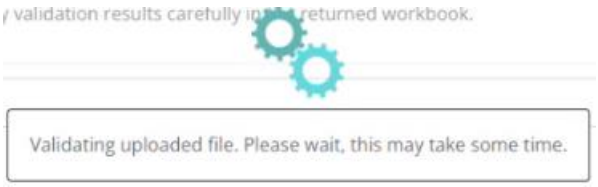
If there are no errors, only warnings, you can still import the spreadsheet. However, we recommend reviewing these warnings before uploading.

1. Go to **Downloads**. Open up the file with 'validated' in the title. The file will open.
2. The **Instructions** tab is displayed. Read through the instructions carefully.
3. Click the **General Absence** tab. The **General Absence** tab is displayed.
   - Any tabs highlighted in red denote a **Critical Issue**.
   - Any tabs highlighted in yellow denote a **Warning**.
   - Any tabs highlighted in green denote **OK** and do not need to be changed.
4. Click on any of the yellow or red tabs.
   - Any cells highlighted in red denote a **Critical Issue**.
   - Any cells highlighted in yellow denote a **Warning**.
   - Column A confirms whether there are any **Warnings** or **Critical Issues**. Hover over the cells in column A and the cell the **Warning** or **Critical Issue** relates to will be shown.
5. Make any changes to the highlighted cells.
6. Move through each tab highlighted in red or yellow and repeat the steps above.
7. Click the **Reset** button
8. Save the validated version by clicking **File > Save** and return to the system screen.
9. Scroll down to the **To Import Your Data** section and click the **Choose File** button. This will open up a new **Open** window.

10. Go to **Downloads** and open up the last file you downloaded and click **Open** at the bottom of the window. You will return to the main screen.

11. Click the green **Validate** button and the system will check the document through for any warnings or errors within the document.

12. A message will appear to show the document is being checked.



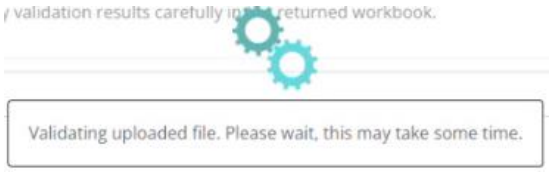
13. If the file passes validation you will see the following message within the screen

14.

and warnings, see **Errors and Warnings** below.

15. A **Confirm Import** window will appear. Please be aware that any information you have changed within the spreadsheet will overwrite any information in the system, if you do not wish to over-ride these changes click **Cancel** or to override these, click **Import**.

16. A message will appear whilst the system imports the information and the data within the spreadsheet will be imported into the module.



17. Once the information is imported you will see the following message within the screen:

18. If this message is not seen and instead replaced by remaining errors and warnings, repeat the steps above until no errors and warnings are shown.

    Warnings relate to potential errors identified by the system. Warnings can be resolved or left unchanged if the information is accurate, but you are able to import the spreadsheet.

19. To view the details you have added, go to the left-hand side of the system and click **Absence Management**. A list of further menu options will appear.

20. Click **Import Absences**. The **Absence Management** page is displayed. This will show all absence records.

    Once imported the spreadsheet you have used before cannot be used again. Therefore, should you need to repeat the process you will need to repeat the process again, downloading the spreadsheet again.

Absence Instances

Absence Instances is a useful area to view all absence data and to customise and export reports. The information within Absence Instances replicates the information within **Absence Records** but displays each instance individually. This area also allows you to view any open absences which need to be updated with a close date.

Module Tip!

When absences are added, the users may not always enter an end date. To ensure that all absences are kept updated, set a weekly task to review end dates. Double click on the title of the End Date column. This will show any absences without an end date. To update the end date of any of the absence instances, click on the pencil icon.

Absence Instances

Recent absences can be viewed within **Absence Instances**. This provides a table with all absences listed in chronological order.

The data table within **Absence Instances** displays each absence, including absence **Type**, **Reason**, **Start Date**, **End Date**, **Date Added**, current **Status**, **Department**, **Role** and **Time Lost** in days.

Click the first icon to view the employee record within the **Employees** module of the employee related to the instance, this is not their Absence Record.

Click the eye icon next to the absence to view the specific absence.

Click the third icon to view the relevant employee's full Absence Record within the **Absence Records** section of the Absence Management module. This can be useful when looking to consider patterns and trends and all absence instances relating to the employee

Click here to edit the Absence Instance.

Click the red cross icon to archive the absence. The absence will now appear within the Previous Employee Absence, along with absences relating to previous employees. Archiving the absence will remove it from all relevant metrics.

Module tip!

Use the Absence Date Filter at the top of the screen to view absences within a particular time period. This is useful to view employees with high numbers of absence instances over a set period, for example the end of a specific term, or within a particular month.

This data table can be exported at any time by clicking the **Export** button. This is useful for

1. On the left-hand side of the system window, select **Absence Management**. A list of further menu options is displayed.
2. Select **Absence Instances**. The **Absence Management** module is displayed showing all absence instances.
3. Select the instance you wish to view and select the relevant icon in the far-right hand column.

Holiday Carry Over

This section of the module allows you to view and update the amount of leave each employee can carry over to the next absence period.

Carry-Over Settings are managed within the **Year-end Carry-Over Settings** tab in **Absence Management Settings**.

Metrics

Flagged Records

Flagged Records are records where the remaining holiday amount is bigger than the automatic carry-over amount for the jo role.

Clicking on this box will show/hide only flagged records.

Total Days to Carry Over

Total Days to Carry Over displays the sum of final carry-over amounts for all the job roles.

Holiday Carry Over Approvals Table

View:

- **Employee**
- **Job Category**
- **Absence Period**
- **Policy applied**
- **Allowance:** Total annual paid leave entitlement

  If 0 is displayed there is no applicable policy selected. Policies are managed within the **Year-end Carry-Over Settings** tab in **Absence Management Settings**.

- **Remaining:** Allowance minus days taken.
- **Auto C/O:** Auto holiday carried-over amount based on the policy selected.

  If 0 is displayed there is no applicable policy selected. Policies are managed within the **Year-end Carry-Over Settings** tab in **Absence Management Settings**.

- **Final C/O:** The final holiday carry-over amount that will be applied to the job role at the end of the holiday period.

Update Carry-Over allowance

Carry-Over Settings are managed by staff group within the **Year-end Carry-Over Settings** tab in **Absence Management Settings**. However, the carry-over allowance for an individual employee can be overridden within the **Holiday Carry Over** section of the Absence Management Module.

1. On the left-hand side of the system window, select **Absence Management**. A list of further menu options is displayed.
2. Select **Holiday Carry Over**. The **Holiday Carry Over** page is displayed with the carry over allowances and remaining days for each employee.
3. Click the pencil icon next to employee you want to update.
4. In the **Final Carry-over Amount** field, enter the new amount.
5. Click **Save**.

To revert to the auto carry-over amount, click the arrow icon.

Absence Reporting

Standard absence reports can be viewed within **Absence Instances** and **Absence Reports**. In addition, you can export any of the data tables at any time.

Data Exports

1. On the left-hand side of the system window, select **Absence Management**. A list of further menu options is displayed.
2. Select **Absence Instances**. The **Absence Management** module is displayed showing all absence instances.

   Data can be exported at any time by clicking the **Export** button. Select from **Word** or **Excel**. The file will appear within your downloads.

   Use the **Absence Date Filter** box to select the period you wish to view, entering the **Start Date** and **End Date**.

5. Select from **Word** or **Excel**. The file will appear within your downloads.

Standard Absence Reports

Reports can be downloaded using the **Reports** button at the top of the **Absence Records** page.

Reports include:

- Attendance Percentage
- Holidays by Department
- Working Time Lost
- Absence Triggers Hit
- Absences Paid/Unpaid
- Outstanding Self Cert and RTW forms
- Sickness Absence by Reason
- All Absence Instances

1. On the left-hand side of the system window, select **Absence Management**. A list of further menu options is displayed.
2. Click **Absence Records**. The **Absence Management** module is displayed.

3. Click the **Reports** button. A list of options is displayed.

4. Click the report you wish to view. The report will appear within your downloads.

   The icon next to each reports denotes the format of the report.

Trust Overview

Trusts can view Absence data across the entire trust via Trust Overview, both within the Summary and All Absences sections. The Absence Setup section allows users to configure settings which apply to all schools within the Trust.

Summary

This page shows all employees, click on the employee's name to see their absence record.

If you wish to view employees from a certain property select the **Employees by Property** tab.

You can also use the **Absence Record Search** box on the far right-hand side, to search for a word or phrase in all table columns.

Click the eye icon next to the employee you wish to view, to view and update absences for that employee. This will take you to the relevant property or school within the system.

1. On the left-hand side of the system window, select Trust Overview.
2. Select **Absence Management**. A list of further options is displayed.
3. Select **Summary**. The Absence Management module is displayed, and a variety of metrics are displayed.

   Absence data will default for the current absence period defined within **Settings**.

   Absence Period can be amended by entering an **Absence Period Start** and **Absence Period End**.

   Trust users can view their Attendance Rate Compared to MAT.
4. View **Absences to Approve** on the right-hand side of the screen.
5. To view more details, click the arrow in the top right of any of these metrics to move into specific details, the training courses these relate to and the users they were assigned to.
6. Scroll down to view further infographics.
7. Scroll down to the bottom of the screen to view information regarding **Triggers**.
8. Triggers are configured in **Settings**.
9. Scroll down to view **All Absences By Type**.

Reports

1. Standard absence reports can be viewed within **All Absences** via the **Reports** button at the top of the screen. In addition, you can export any of the data tables at any time.

All Absences

This page shows all employees, click on employee's name to see their absence record.

If you wish to view employees from a certain property select the **Employees by Property** tab.

You can also use the **Absence Record Search** box on the far right-hand side, to search for a word or phrase in all table columns.

Click the eye icon next to the employee you wish to view, to view and update absences for that employee. This will take you to the relevant **Absence Record** within the related property (school) in the system.

Absence Setup

Please view the **Enhanced Absence Management Settings Guide**.
